How to read time

1 Learn how a clock is divided. A clock is divided into 12 sections. On top of the clock, you will see a "12." To the right of the "12," you will see a "1." If you follow the numbers, going right or "clockwise," they will move from "1" to "12." [1] The numbers marking each sections are the hours. The sections between numbers are divided into 5-minute segments. Sometimes, there are tiny lines running along the clock dividing these segments. 2 Use the little hand to read the hour. Clocks have 2 hands: a little hand and a big hand. The little hand marks the hour. Whichever number it's pointing to is the hour of the day. [2] For example, if the little hand is pointing to "1," it's in the 1 o'clock hour. 3 Use the big hand to read the minutes. Take the number that it is pointing to, and multiply it by 5 to get the minutes. When it is pointing to the "12," it is the top of the hour. If the big hand is an a mark between the numbers, count the marks, then add them to the minutes (clock number times 5). For example: [3] If the big hand is pointing to "3," you'll know that it is 15 minutes past the hour. If the big hand is pointing to "12," it is the top of the hour. Read whatever number the little hand is pointing to. If the big hand is between "1" and "2," note what dash it is pointing to. For example, if it is on the 3rd dash after the "1," it is 8 minutes past the hour. (1 x 5 + the number of dashes). 4 Put these together to get the time. Once you've found the hour and the minutes, you can tell time. For example: [4] If the little hand is pointing to "1" and the big hand is pointing to "12," it is "one o'clock." If the little hand is pointing to "1" and the big hand is pointing to "2," it is "one-ten" or "ten minutes past one." If the little hand is pointing to "1," and the big hand is half-way between the "2" and "3," it is around "one-twelve" or "twelve minutes past one." 5 Differentiate between AM and PM. You can't tell AM or PM by reading a clock. You have to know the time of day. From midnight to noon the next day, the time is in AM. From noon to midnight, the time is in PM. [5] For example, if it's early in the morning and the little hand is pointing to "9" and the big hand is pointing to "12," it's "9 o'clock AM." 1 Read the first number to determine the hour. A digital clock is made up of 2 numbers separated by a colon. The first number on a digital clock marks the hour. [6] For example, if the first number reads "2," it's in the 2 o'clock hour. 2 Read the second number to determine the minutes. The second number on a digital clock, found after the colon, marks the minutes into the hour. [7] For example, if it reads "11," it is 11 minutes into the hour. 3 Put these together to get the time. Once you have both the numbers, you should be able to tell the time. If the clock reads "2:11," this means the time is "two-eleven" or "eleven past two." [8] 4 Determine if it's AM or PM. Some digital clocks will say if it's AM or PM somewhere on the clock. In the absence of this label, remember time of day. Times are marked as AM if they fall between midnight and noon. Times are marked as PM if they fall between noon and midnight. 1 Learn roman numerals. Some clocks are marked by roman numerals, so learn roman numerals 1 to 12. An "I" is counted as 1, a "V" is counted as 5, and "X" is counted as 10. If a symbol appears before another symbol, it's subtracted from the value. If a symbol appears after another symbol, it's added to the value. 1 to 3 are simply written as "I, II, III." 4 is written as "IV." The "I" subtracts 1 from the "V" (which symbolizes 5), adding up to 5. 5 is then marked by a "V" and the numbers leading up to 10 are marked by adding "I" symbols. The number "VI" is 6, "VII" is 7, and so on. 10 is marked by an "X." Eleven and 12 are marked by adding to the "X." 11 is written as "XI" and 12 is written as "XII." 2 Read a clock without numbers. Not all clocks have numbers. They may have symbols marking the hours instead. Starting at the top of the clock, mentally mark this as twelve. Then, move to the right and count "1, 2, 3, 4, ..." and so on. This will help you determine which hour each symbol marks. [9] 3 Convert military time to civilian time. Some digital clocks are written in military time but, luckily, this is easy to convert. From 1 AM to noon, military time is the same as civilian time. After noon, you have to do some work to determine time. [10] Numbers lower "10" are marked by placing a zero in front of them. For example, 9 o'clock AM, is written as "0900." Subtract "1200" from the time to determine times that do not start with a zero. For example, 1300 subtracted from 1200 is 100. In military time, therefore, 1300 hours is 1 o'clock PM. Add New Question Question How do I read the clock a bit faster? Always start with the little hand and remember each big number counts by fives. Just practice until you get faster. Question What time is it when the small hand is on 8 and the big hand is on the 6? The small hand indicates which hour it is and the big hand indicates what minute it is in 5 minute increments so when the small hand is on the 8, it indicates the eighth hour. The big hand on 6 indicates 30 minutes, so it is 8:30. Question When the hour hand is on the 8 and the minute hand is on the 3, what's the time? 8:15. When the hour hand is on the 8 that's 8:00, and when the minute hand is on the 3 that means 15 minutes, so the answer is 8:15. Question How can I tell the difference between AM and PM? On analog clocks, you will have to use your judgment. On digital clocks, there is often an "AM" and/or "PM" light that will illuminate to indicate this. Question When the minute hand on the 7 and the hour hand between the 8 and 9, what time is it? if the hand is in between that means the time is 8:35. Question What does it mean when someone says "25 to 3"? 25 to (or "til/until) 3 means that it will be 3 o'clock in 25 minutes. In other words, it's 2:35. Question When the little hand is on the 8 and the big hand on the 3, what time is it? 8:15. Question What time is it if the long hand is on the 10 and short hand is between 10 and 11? If the long (minute) hand is on the 10, it's XX:50. If the short (hour) hand is between 10 and 11, it's 10:XX. Therefore, in your scenario, the time would be 10:50. Question What does it mean if the hand is pointing to nine? It depends on whether it is the shorter or longer hand. It could either mean that it is nine o'clock or that it is 45 minutes into the hour. Question Is 12pm noon or midnight? It's noon. Staying up to date on current news demands a solid news publication that will give you all the information you need. "The New York Times" newspaper offers you several different options for reading its content, both online and in print. History of "The New York Times" "The New York Times" dates back to 1851, when it began applying its steadfast mission to find the truth and pass it along to those who want to read it. After reaching a milestone of four million total subscriptions near the end of 2018, "The New York Times" has rededicated itself to providing relevant and timely news to its readers. Free Reading of "The New York Times" You are welcome to visit "The New York Times" website to access up to five free articles per month without a subscription. This free access enables you to browse the online newspaper sections, clicking on articles you wish to read. When you reach the five-article limit, your access will be blocked unless you purchase a subscription. Obtaining a Paid Subscription If you opt to purchase a paid subscription to "The New York Times," you have a wide array of options to fit your needs. You can purchase a package with a daily and/or Sunday print, and unlimited access to all "The New York Times" online content. You also get access to the daily crossword puzzle and "NYT Cooking" with this package. A basic subscription provides unlimited access to the online articles, as well as some priority access to periodic subscriber exclusives. An academic rate is also available for students and educators, and you can choose either a digital or home delivery subscription. If you're just interested in playing the daily crossword, there's an option for that, too. You can subscribe to just the puzzle, paying monthly or annually. Free Trial! Start your subscription with a four-week free trial period to make sure you wish to continue. You'll have to provide payment information, but if you cancel within the trial period, you won't be charged. If you decide to continue, you'll become a paying subscriber. Your payments will be charged automatically until you cancel. Setting Up Your Package To proceed with your package, you have to provide your email address and other contact information. "The New York Times" will also collect your billing information so its prepared to bill you if you become a paying reader. If you have any questions, you can call "The New York Times" to get phone support. You can also text a question or concern to the newspaper. Other contact options include live chat on the website and emailing, although emails may take up to 48 hours for a response. MORE FROM QUESTIONS ANSWERED.NET
